N864: Adult Gerontology Acute Care Nurse Practitioner Integrative Practicum

Date: Semester: Year:

Student's Name:

Student Tel #: Student E-mail:

Clinical Faculty Name: Faculty Email:

Faculty Phone:

COURSE OBJECTIVES:

Upon completion of the course, the student will be able to:

1. Synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment, diagnosis, and management of complex acute, critical, and chronically ill patients.
2. Integrate comprehensive, individualized management strategies based on research, clinical practice guidelines, and individual patient and family needs.
3. Utilize advanced health assessment skills to perform appropriate comprehensive or focused examinations and differentiate normal from abnormal.
4. Incorporate information from the health history, physical examination, diagnostic tests to identify differential diagnoses and priorities of care.
5. Implement a collaborative comprehensive plan of care to maximize physical and mental health, considering the indications, contraindications, risk of complications, and cost benefit of diagnostic tests and therapeutic interventions.
6. Perform diagnostic and therapeutic interventions to evaluate and stabilize rapidly changing health problems.
7. Individualize therapeutic interventions and teaching strategies related to social, cultural, spiritual, bioethical, and economic needs to the patient and family.
8. Collaborate with other health care professionals to deliver evidence-based, safe, and cost-efficient health care.
9. Integrate standards of professional behavior and accountability in the implementation of the Acute Care Nurse Practitioner role.
10. Implement the role of the Acute Care Nurse Practitioner to influence health policy, improve quality health care, promote access to care, and promote the role of the advanced practice nurse.
11. Utilize self-evaluation to monitor and evaluate clinical practice, improve practice quality, and improve practice outcomes.
