
AGESIM REALLY DOES IMPACT CARE

2020 systematic review by Chang and colleagues, ageism led to significantly worse health outcomes in 95.5% of the studies (n=422) examined and in 74% of the ageism health associations examined. They examined both individual and structural ageism.
Figure 1

Nursing Homes With Relatively High Shares of Black or Hispanic Residents Were More Likely To Have At Least One COVID-19 Death

Share of Nursing Homes With At Least One COVID-19 Death (as of October 11, 2020):

- Facilities with High Share of Black Residents: 63%
- Facilities with Low Share of Black Residents: 40%
- Facilities with High Share of Hispanic Residents: 55%
- Facilities with Low Share of Hispanic Residents: 44%
- Facilities with High Share of White Residents: 37%
- Facilities with Low Share of White Residents: 58%

All Facilities: 45%

NOTES: Includes 13,982 nursing homes for which race/ethnicity data were available for all groups and for which resident cases or deaths were not > total number of beds. High share of Black residents or Hispanic residents refers to 20% or more. High share of White residents is 80% or more. Facilities may fall into more than one of these groups.

Aging

Framing can help address negative attitudes toward aging. FrameWorks' research offers powerful ways to shift thinking about aging and older people.

People are living longer, healthier lives. But ageism stops us from adapting our society to that reality.

Some ways of countering ageism don't work the way we expect. “Super senior” stories featuring tremendous late-life accomplishments do more harm than good. Comparing ageism to racism or sexism also backfires. It leads people to think that ageism isn’t as serious as these other forms of discrimination.
Concepts and ideas included in this frame element:

- A just society treats all members of society as equals.
- Right now our society is not treating older people as equals; in fact, we are marginalizing their participation and minimizing their contributions.
- As equal members of society, older adults have a rightful claim to be full participants in all spheres of life: socially, culturally, economically, and legally.
- To live up to our ideals, we need to reshape society so that older people are fully included in our communities.

User Notes:

- Keep the focus on society’s responsibility to treat all people as equals. Avoid slipping into appeals based on compassion, mercy, or the right to dignity, as these can reinforce the notion of older people as “others” and evoke paternalistic attitudes.
